EDUCATION

New York University

B.A in Computer Science, Minor in Business — 3.64 GPA

New York, New York

Aug. 2023 – May 2027

Relevant Coursework: Distributed Systems (A), Algorithmic Problem Solving (A-)

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, SQL, Go, Java, C++

Backend: FastAPI, Node.js, Express, REST APIs, PyTest, JUnit

Databases: PostgreSQL, MySQL, Redis, MongoDB

Infrastructure: Docker, OpenTelemetry, Kubernetes, Prometheus, CI/CD, Linux, AWS/GCP, git

EXPERIENCE

Software Engineering Intern

Crossroads AI

Alexandria, VA

Backend Platform

Jun. 2026 – Present

- Refactored a production LLM document-parsing engine by breaking up 2,000+ line modules and decoupling parser services from orchestration logic, improving code organization and maintainability.
- Set up the team's engineering workflow end-to-end: self-hosted Gitea, protected-main + PR-only review process, issue/PR templates, and CI test enforcement.

AI Infrastructure

May. 2025 – Oct. 2025

- Shipped an on-prem RAG platform to production as sole engineer (Python, Qdrant, Ollama, Docker).
- Built a document ingestion pipeline indexing **80+ GB** of VDR docs; increased parse success from **~65%** to **~90%**; added Langfuse observability, automated testing & CI enforcement.

Software Engineering Intern

Jun. 2024 – Aug. 2024

Han's Laser

Shenzhen, China

- Developed Qt/C++ operator GUIs and multithreaded motor-driver control modules; refactored legacy code to improve reliability.
- Debugged TCP/UDP artifact transfer to GitLab; improved throughput & reliability by **~20%**.

M&A Analyst Intern

Jun. 2023 – Aug. 2023

Crossroads Capital

Alexandria, VA

- Researched a \$1.6B corporate restructuring & financing in China; synthesized market and company analyses.

Software Engineering Intern

Jun. 2022 – Aug. 2022

Global Pal

New York, NY

- Built a Google Maps module via the Google Maps API (Python client).
- Collaborated with cross-functional teams across business and engineering.

SELECTED PROJECTS

uselimit | *Typescript, Redis, PostgreSQL, OpenTelemetry*

Apr. 2026 – Present

- Built a lightweight usage credits + limits layer for AI/API apps
- Enables usage metering, credit burndown, quota enforcement, and abuse/cost controls for AI/API apps.

OpenTelemetry Collector Open Source Contributor | *Go, mdatagen, featuregate*

- Added stability-level resource-attribute metadata to the mdatagen code generator and fixed ToVersion API documentation (#15371, #15457).

SPOKEN LANGUAGES

English, Japanese, Chinese, Portuguese
